sunice®

INTRODUCES ALL NEW EDGE COLLECTION, TRIMMER FIT, BOLD DESIGN AND SLEEK STYLE

Taking its inspiration from PGA Tour young guns, the new Sunice Edge collection has a trimmer fit, sleek style and is packed full of cool details.

Sunice Edge is made up of a range of garments that allow golfers to create a layering system. Outerwear is all made from GORE-TEX® with Paclite® technology - the lightest, most packable of Gore's waterproof membranes. Mid layers use WINDSTOPPER® technology, which thanks to its high level of breathability offer real comfort and protection for everyday play. The collection also includes Silver polos, using X-STATIC® fabric technology which is recognised as one of the most effective anti-microbial agents in the world.

As well as performance, Edge is all about looks. The black, white and lime colour palette is striking and embossed logos, interesting placements and striking contrast colour zip designs bring the collection bang up to date.

Sunice Edge is launched as part of the SS13 collection and is set to appeal to a golfer looking for the right balance of market leading technologies, and appealing, contemporary designs.

INTRODUCING **EDGE** COLLECTION

A new collection of GORE-TEX® waterproofs and high performance layering with a trimmer fit and sleek details inspired by PGA Tour cutting-edge young guns.
